

*Hear What You've Been Missing!™***AES 2008: FUTURE SONICS NEW M3 and M9 MODELS OF ATRIO®
PROFESSIONAL EARPHONES FOR LIVE STAGE, RECORDING STUDIOS, AND
PERSONAL DIGITAL MEDIA PLAYERS**

Bristol, PA -- October 2, 2008: Innovators of the original award-winning [Ear Monitors®](#) and [Atrio®](#) brand professional earphones for today's top musicians, concert tours, broadcasting, gaming systems and personal digital media players, [Future Sonics](#), is proud to announce the release of two new colors in their Atrio® line of universal-fit professional earphones. The new m3 (earth beige) and m9 (ruby red) were the colors most requested by customers for nearly any application. Like all Future Sonics personal monitors, they feature the company's own design and manufacture of proprietary drivers for unmatched natural sound quality, reliability and performance.

"In the house of worship market, a stealthy, warm earth tone color was our number one request," indicates Marty Garcia, founder and president of Future Sonics. "For the new younger performers, and for consumers, they wanted our strong, bold red that would stand out and make a visual statement."

The recently updated and lightweight Atrio® Professional Earphones' design is the ideal choice, now in four colors, for a wide range of applications including the live concert stage, recording studios, broadcasting, and house of worship. Atrio® is also the perfect match for digital media players like Apple's iPod® products, iPod® Touch, iPhone®, Microsoft Zune®, portable game systems, plus portable Sirius® / XM® Satellite receivers and much more for those consumers who want professional audio quality from their personal digital media players and devices.

Atrio® Features

- Outstanding energy and feel with unmatched bass response accuracy
- Warm, natural midrange for true-to-life vocals and instrumentation
- Accurate and detailed treble without the "bite" of other brands
- Ultra-lightweight design for less drag on the ear and a better fit
- 100% armature-free studio-grade MG5pro™ drivers
- Crossover-free acoustic architecture
- Multiple comfortable fitting options included
- Upgrade to SofterWear™ custom-fit availability
 - QuietCables™ II for excellent audio quality, more flexibility, less tangling, and more comfortable fit around the ear - or hanging from the ear
- TrueTimbre™ natural frequency response of 18Hz - 20,000Hz
- BIGGER SOUND @ lower volume™ with less need to crank up the volume to achieve the full range of natural audio

Hear What You've Been Missing![™]

BIGGER SOUND @ lower volume[™] Atrio® professional earphones are recognized by [H.E.A.R.®](#) (Hearing Awareness and Education for Rockers) as a product offering its full range of sound and performance at even the lowest volumes. Future Sonics continues to support hearing education and conservation as it has for more than 20 years.

Atrio® earphones carry a one-year warranty and can be purchased direct from Future Sonics as well as authorized dealers listed online.
